

Roller Garage Door Opener

Controll-A-Door® RDO-1

Enjoy the convenience, safety and security you always get from a Garador™ Controll-A-Door® – Now with Tri-Tran™ technology

Extra strong half horse power motor encased in a solid steel chassis, the Garador™ Controll-A-Door® (RDO1) now comes with Tri-Tran™ advanced multi frequency technology. The confidence and reliability you only get from Garador™.

Roller Garage Door Opener

Controll-A-Door® RDO-1

Low standby power usage helps improve our environment

Tri-Tran™ multi frequency technology effectively eliminates interference

Controll-A-Door® RDO-1 automatic opener

TRI-TRAN™ MULTI FREQUENCY

Garador's™ Tri-Tran™ multi frequency technology means your opener will never have interference from household wireless products such as baby monitors and door bells. So when you want your garage door to open, it will.

PROGRAMMABLE OPERATING MODES

Adjust the opener to suit individual preferences such as vacation mode to limit remote access when you're away, pet mode to allow pets easy access or for ventilation and auto close* to ensure your garage is always left secure.

* Safety infra-red beams required.

LED LIGHTING

LED lighting has a life span of 30,000 hrs. Never again will you have to replace a light bulb on your opener. Preset to 2.5 mins, it automatically switches on and off as you open and close your door. This can be adjusted.

REDUCED ENERGY CONSUMPTION

Features decreased energy use when in standby mode providing savings through lower electricity bills.

SOFT START / SOFT STOP / QUIET MOTOR

Programmed to open a garage door slowly, then speed up, and gently stop, the DC motor is smooth, quiet and reliable allowing you piece of mind for many years.

ACCESSORIES

Rechargeable Battery Backup

If power supply to the opener is broken, the door will still be operational with the rechargeable battery backup.

Solar Power System

The backup battery can be charged via solar power to allow operation in remote areas with no power supply.

Safety Infra-red Beams

Provide added safety if the beam is broken while closing, the door will stop and reverse without touching the object.

Keypad Entry

Allows entry via your own PIN, without a remote.

Transmitter Wall Button

Can be mounted inside the garage with no wires required.
